

money which made possible the construction of the chemistry building expansion and the Performing and Visual Arts Center. And as part of the University's Third Century Campaign, he also initiated the Vincent J. Dooley Library Endowment Fund which was created with Coach Dooley's personal gift of \$100,000 to the University library. Under his leadership, the Fund raised over \$2.3 million.

In addition to his commitment to Georgia's athletic facilities, he was instrumental in the Athletic Association's participation in the University's Ramsey Student Activities Center, a facility rated by *Sports Illustrated* in 1997 as the top student physical activities building in America. It cost more than \$35 million, over \$7 million of which was funded by the Athletic Association including \$2 million in advance to begin the project. The complex, which hosted the 1999 NCAA Women's Swimming and Diving Championships and the 2002 NCAA Men's Swimming and Diving Championships, includes competition facilities for varsity swimming and volleyball and practice arenas for basketball and gymnastics.

His community service and charity work is extensive and includes work with the Heart Fund, Multiple Sclerosis, Juvenile Diabetes, Boy Scouts, the homeless, and he is currently serving on the Advisory Board of the Salvation Army. He has served 28 years as the long-standing chairman of the Georgia Easter Seals Society and in 1987 was named National Volunteer of the Year for his service. For his many contributions, a new Easter Seals facility in Atlanta was built and named for him in 1990. He and his wife, Barbara, are currently co-chairing a fundraising campaign to establish a Catholic high school in the Athens and northeast Georgia area. Dooley, who was instrumental in the University's campus being designated as an arboretum, was presented with the Georgia Urban Forest Council's 2001 Individual Achievement Award given for significant accomplishments in promoting urban forestry in Georgia.

He served six years on the Advisory Committee to the Atlanta Olympic Organizing Committee and was in Tokyo with his former player, ACOG president Billy Payne, when Atlanta won the bid to host the 1996 Games. Through his efforts and association with Payne, Dooley helped secure for Athens and the university three Olympic venues (soccer, volleyball, and rhythmic gymnastics) which was the largest number of events in a city outside Atlanta. Dooley was selected as a flame bearer in the 1996 Summer Olympics torch relay receiving the flame from Payne in Sanford Stadium. He also chaired a \$1.5 million fund raising campaign for new Salvation Army facilities in Athens.

Another honor came Dooley's way in June, 2001, when he was named the Division I-A Southeast Region Athletic Director of the Year by the National Association of Collegiate Directors of Athletics (NACDA) and award sponsor Continental Airlines.

Dooley was born into an athletic family in the Alabama coastal city of Mobile, September 4, 1932. His younger brother Bill, former head football coach at North Carolina, Virginia Tech, and Wake Forest, was an All-SEC guard at Mississippi State in 1954. After graduating from McGill High in Mobile, Dooley accepted a football scholarship to Auburn where he was an all-star football and basketball player. He received his Bachelor's Degree in Business Management ('54) and Masters in History (1963). After serving in the Marines and as an assistant coach at Auburn, he was named head coach of the Bulldogs in December, 1963, at the age of 31. Dooley still maintains his academic and continuing education interests by auditing

classes at the University in such disciplines as history, political science, art history, and horticulture.

Dooley is married to the former Barbara Meshad of Birmingham. They have four children; Deanna (Mrs. Lindsey Cook), Daniel (married to the former Suzanne Maher), Denise (Mrs. Jay Douglas Mitchell), and Derek (married to the former Allison Jeffers). The Dooleys also have ten grandchildren: Patrick, Catherine and Christopher Cook; Michael and Matthew Dooley; Ty, Joe and Cal Mitchell; and John Taylor Dooley and Peyton Dooley.

FAST FACTS ON VINCENT DOOLEY

Program success—In NACDA's Director's Cup Competition that recognizes the top athletic programs in the nation, Georgia has finished as follows over the last five years: 2001-02—7th; 2000-01—3rd; 1999-2000—12th; 1998-99—2nd; 1997-98—8th.

Standard bearer for academic excellence—over 100 Academic All-Americans; 43 NCAA Post-Graduate Scholarship recipients; seven NCAA Top Eight Award winners; seven SEC Boyd McWhorter Scholar-Athlete of the Year winners; three NCAA Woman of the Year winners, more than any school in the country.

Hall of Fame Football Coach—Inducted into College Hall of Fame in 1994; 25 seasons (1964-88); 20 bowl games; 201 victories ranked third nationally among active coaches at time of his retirement; 1980 National Championship; six SEC Championships (1966, 68, 76, 80, 81, 82); 1980 and 82 NCAA National Coach of the Year; SEC Coach of the Year seven times; State of Georgia Sports Hall of Fame; State of Alabama Sports Hall of Fame; Sun Bowl Hall of Fame; Georgia-Florida game Hall of Fame; Chick-fil-A Peach Bowl Hall of Fame.

Award winning athletic director—2000 Georgia Trend Magazine Top 100 Georgians of the Century; 2001 Amos Alonzo Stagg Award from American Football Coaches Association for lifetime contributions to the sport of football; 2001 NACDA Division I-A Southeast Region Athletic Director of the Year; 1984 "Georgian of the Year" by the Georgia Association of Broadcasters; 1984 "Sports Administrator of the Year" by the State of Georgia Sports Hall of Fame.

SMART SECURITY AND NONPROLIFERATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, when it comes to nuclear weapons, the policy of this administration looks like it was just pulled out of a 20-year-old time capsule. More than a decade after the fall of Soviet communism, President Bush and his national security team are still fighting the Cold War. Their budget called for more than \$100 million for research and testing of new nuclear weapons, including the robust nuclear earth penetrator and a so-called low yield nuclear weapons program.

Fortunately, the Subcommittee on Energy and Water of the Committee on Appropriations lives in the year 2004 with the rest of us, and initially has rejected these requests.

Even India and Pakistan, two nations mired in generations of conflict, whose shared border has been called the world's most dangerous nuclear

flashpoint, were recently able to reach a bilateral confidence building agreement on nuclear weapons. Meanwhile, the Bush administration enthusiastically jumps into the nuclear arms race. They believe the only good defense is a buildup of new nuclear weapons, which happens to violate the Nuclear Nonproliferation Treaty that the United States signed in 1970.

They believe that the only good defense is a gigantic offense. But just how strong does our Nation need to be? We already have 9,000 strategic nuclear warheads. How many of these weapons of last resort do we require in order to be secure; how much money do we need to spend; how much money do we need to spend on nuclear weapons; how much more dangerous must we make the world; and how many domestic priorities must we neglect before we decide that enough is finally enough?

There has to be a better way, a more sensible way, an approach that, to use Abraham Lincoln's words, calls on the better angels of our nature, Mr. Speaker, there is.

I have introduced H. Con. Res. 392 to create a SMART Security Platform for the 21st Century. SMART stands for Sensible, Multilateral, American Response to Terrorism. SMART treats war as the absolute last resort. It fights terrorism with stronger intelligence and multilateral partnerships. It aggressively invests in the development of impoverished nations. It controls the spread of weapons of mass destruction, with a renewed commitment to nonproliferation. And instead of saber rattling, instead of employing irresponsible rhetoric, like "axis of evil," the SMART nonproliferation approach calls for aggressive diplomacy, strong regional security arrangements and vigorous inspection regimes.

SMART security means the United States will set an example for the rest of the world by renouncing the first use of nuclear weapons and the development of new nuclear weapons. SMART security requires that the United States honor its multilateral nonproliferation commitments. If we are going to throw our weight around, demanding that other nations cease their weapons programs, we had better make sure we are meeting our obligations under the Nuclear Nonproliferation Treaty, the Comprehensive Test Ban Treaty, the Biological Weapons Convention and the Chemical Weapons Convention.

Under SMART, we would invest fully in the Cooperative Threat Reduction Program, the CTR, an innovative partnership in which the Pentagon is working with the former Soviet Union to dismantle the nuclear weapons that were once aimed at our cities. CTR is critical to controlling the loose nuclear materials that are scattered throughout the former Soviet Union, keeping them from falling into the hands of rogue nations or terrorist groups.

Think about the price we have already paid to control weapons of mass

destruction in Iraq, weapons that do not even exist: Hundreds of American lives lost, thousands of Iraqi lives lost, thousands and thousands, in fact over 25,000 American soldiers injured, and hundreds of billions of dollars spent. Should we not be investing in eliminating a genuine nuclear threat? And we ought to be applying the lessons of CTR's success in Russia to dealing with Iran and North Korea.

Mr. Speaker, SMART security is an example. It is tough, but it is diplomatic; it is aggressive, but peaceful; it is pragmatic, but idealistic.

INDEPENDENCE DAY REPLAY OF 2000

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BURGESS) is recognized for 5 minutes.

Mr. BURGESS. Mr. Speaker, coming back into town today and picking up a copy of one of the local papers, I read the headline, "Members Seek UN Election Monitors." Quoting from today's Roll Call, "a dozen Democratic House Members last week called on the United Nations to send monitors to oversee November's U.S. presidential election."

Mr. Speaker, I submit that I was astounded to read that in the paper today. It seems that there are people in this House who cannot get over the facts of the election that was held in the Year 2000, and the facts are that George W. Bush won that election. He won it in the constitutionally prescribed manner of a majority of electoral votes; he won on election day; and he won on every single recount held thereafter, until the Supreme Court said enough recounting 34 days later, and the counts were stopped.

But the President even won in the Miami Herald's recount that came out, I forget, in February or March of 2001, well into the President's first term. The Miami Herald finally acknowledged the fact that indeed George Bush had won Florida's electoral votes and had indeed won the election.

Those 34 days of transition time were critical to the start of this administration. We had an economy that was headed into a recession, and, as we found out later in that year, we had enemies of this country who were gathering strength and preparing to attack this country. Thirty-four days in transition were critical days that were lost.

But now comes this group who says that the events of the 2000 election are so serious that UN monitors are required on U.S. soil to monitor our electoral process.

Mr. Speaker, I will tell you that the constituents of my district just simply do not understand what goes on in Washington, D.C. We have a candidate for the highest office in this land who says that foreign leaders would prefer him to be the President.

Mr. Speaker, we have got a judicial branch that seems to keep its eye on

what the foreign courts are ruling and what they are deciding.

Now, I am sad to say, we have Members of this body who simply do not understand what "sovereignty" means, and how ironic is that at a time when we are celebrating sovereignty in the country of Iraq, we just celebrated Independence Day in this country, and Members of our own body do not grasp that simple concept.

Mr. Speaker, when I was sworn in here 18 months ago, I swore an oath to uphold the Constitution. I think that is a good idea, to have that oath, to swear to uphold the Constitution. I think it might be a good thing if other Members of this body remembered why they are here.

CRITIQUING THE ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. McDERMOTT) is recognized for 5 minutes.

Mr. McDERMOTT. Mr. Speaker, if the last speaker had ever traveled outside the United States, he might understand why it is that every country in the world wants George Bush replaced.

Mr. Speaker, I am going to rise today to address the policies of this administration. I intend to use the "F" word, so be forewarned.

During the administration's watch, America has lost nearly 2 million jobs in the private sector. Through no fault of their own, Americans who are out of work cannot find a job. The administration's response is to classify flipping hamburgers as a manufacturing job.

We could have helped Americans weather the storm by extending unemployment benefits, but the administration turned a deaf ear.

Health care costs have skyrocketed in America, up to an average of 49 percent in 3 years. One in seven American families are struggling to pay medical bills, families are being forced to choose between food, housing and medicine. Unpaid medical bills are a leading cause of personal bankruptcy.

So what does the administration do? Provide health care for everybody in Iraq; muzzle the expert who knows what the prescription drug bill would really cost; and passes a drug bill for seniors after drug companies raise prices three times the rate of inflation, negating any possible benefit from a prescription drug card. There is an "F" word in there someplace.

Today, one out of every three Americans breathes unhealthy air. Thanks to this administration, existing rules are being rolled back so that old, dirty power plants can keep belching their pollutants into the atmosphere. The American Lung Association calls it the most harmful and unlawful air pollution initiative ever undertaken by the Federal Government.

□ 1945

100 million Americans live in places where the air is not fit to breathe. The

administration's response is to label science as fiction and then work to undermine environmental protection. We know the sources of pollution. Coal-fired power plants and diesel trucks are two big culprits. We know how to clean up the air. What does the administration do? Choose polluters over people. Choose polluters over protection. The administration wants to let oil rigs into the pristine Arctic National Wildlife Refuge. The oil companies cannot wait. The only thing greater than America's greed for oil is the insatiable desire for profits by oil companies.

Certainly there must be an "F" word that applies when oil companies post 300 percent profits. The administration's civilian leaders must have lots of "F" words when the world first learned about the prisoner abuse scandals in Iraq. First they denied knowing anything. That was followed by media revelations of what they knew and approved in advance. The Geneva Conventions was something to embrace, not follow. That is the bottom line of the internal White House memos.

Need something else to use the "F" word? The administration has launched an undeclared draft in America. The undeclared draft compels current and former soldiers to fight in Iraq, even if they have already served. The undeclared draft uses rhetoric to mask reality. The military does not have enough soldiers. The administration knows they will be thrown out of office if they told America the truth. So the undeclared draft is called something else for now. Wait till after the election if George Bush wins.

The veterans seeking health care, the administration has a new plan. Bring your checkbooks and get in line. The administration wants to cut hundreds of positions in the VA. They want veterans to pay even more of the financial burden for the purchase of prescription drugs, and it wants veterans to pay a new enrollment fee. The administration's proposed budget for the VA is \$2.5 billion too low, but that is nothing compared to what the administration intends to do to education in title I funding which helps disadvantaged kids across America. This administration underfunds title I by over \$7 billion next year.

Half of every eligible school district in America will receive less grant money. The need is greater, but that does not matter. Only the rich have strong advocates in this administration.

From education to the environment, from veterans to health care, from the economy to forced military service, from moral leadership to global credibility, one word applies to this administration: the "F" word, failure, the administration's failure to create jobs that Americans want and deserve; the administration's failure to protect our land, air, water, and people; the administration's failure to confront military reality; the administration's failure to invest in our future leaders; the administration's failure to address the needs
